

# Why Agile Integration Is Critical To Digital Transformation

Guest Speaker: Jeffrey Hammond,  
VP & Principal Analyst

# Software delivery is now a core *business* competency

## Digital matters..

- Digital experience
- Digital ecosystems
- Digital insights, et al

## Software powers digital..

## Software excellence = Business excellence

www.shutterstock.com · 530505601

# Empowered customers create urgency for change

## › Digital disruption:

- Startups steal customers; old firms get Amazoned

## › Digital transformation:

- Preparing to dish out your own disruption

*Great billiards*

**Make the crazy four-bank shot into the side pocket – and drop an extra ball in the corner**

*World-class billiards*

**Do that *and* leave the cue ball setup for the next shot**

# World Class Software Delivery Is Customer Focused

Position/department

Title at the organization

Base: 300 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of RedHat, May 2018

We identified firms as “successful with integration and digital” if their integration strategy very well supports their agile delivery teams.

## How well does your current integration strategy support your agile delivery teams?

### Successful firms

- **Very well**, integrations are always already there when we need them, and developers can implement without assistance.

### Less successful firms

- **Average**, there are few existing integration points, and teams often need to wait to get access.
- **Below average**, there are few existing integration points and teams, and it takes too long to get access.
- **Not at all well**, there are seldom existing integration points, and it's hard to impossible to get new ones added quickly

Base: 144 enterprise agile development strategy decision makers.

*What do firms that are successful with integration and digital do differently?*

# Successful firms go beyond tech investment to create new visions and architectures for integration

What steps is your team taking/have you taken to modernize your integration strategy?

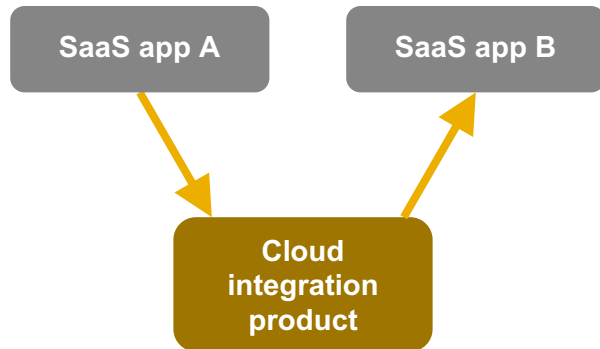

Base: 55 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

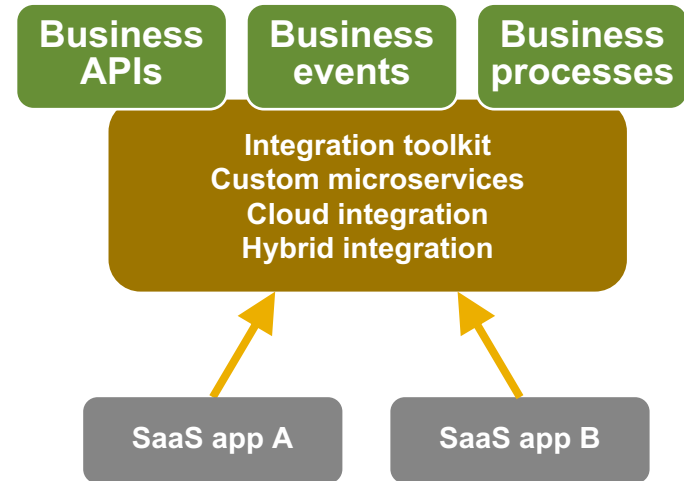

# A continuum of very different integration approaches

*Push data around behind the scenes*

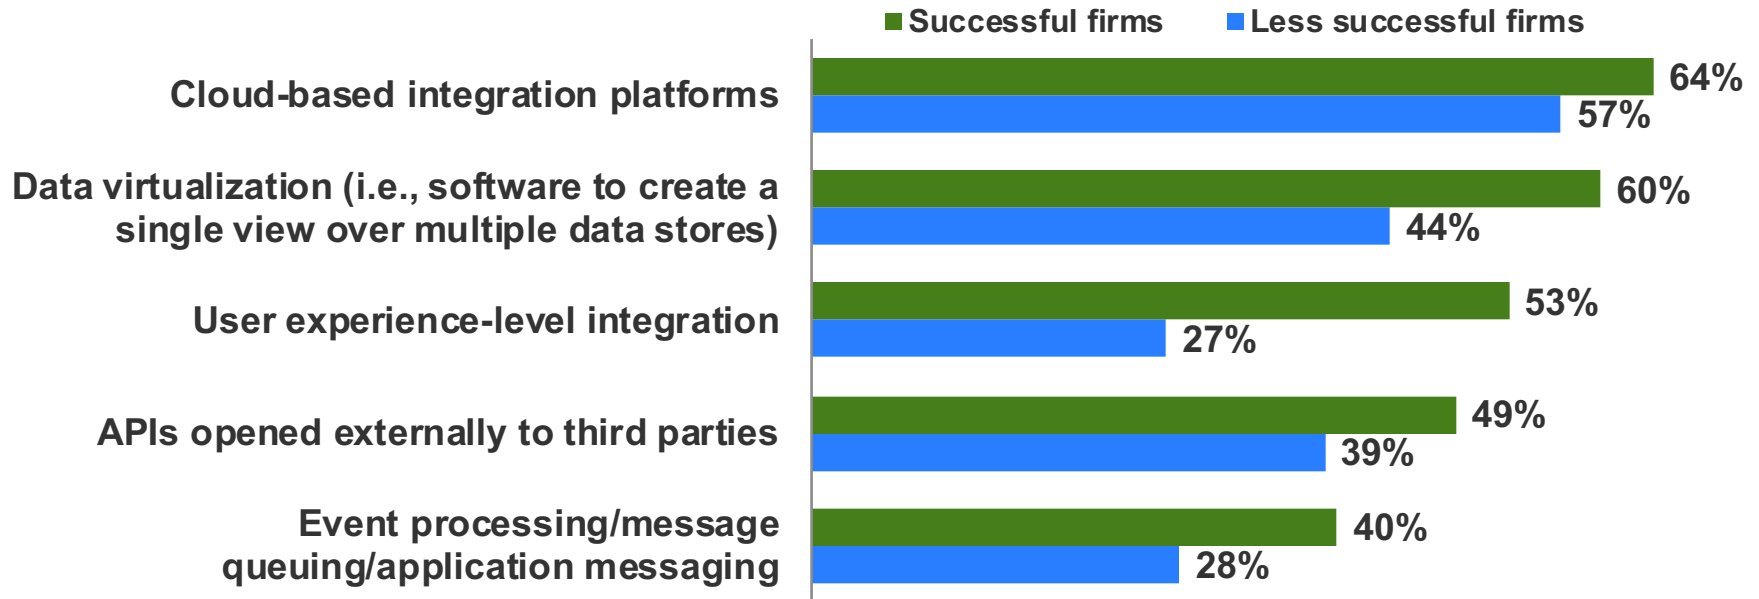

*Mirror digital business design in software*

# Successful firms use many integration styles

Which of the following does your company currently include in its integration strategy? (Select all that apply.)

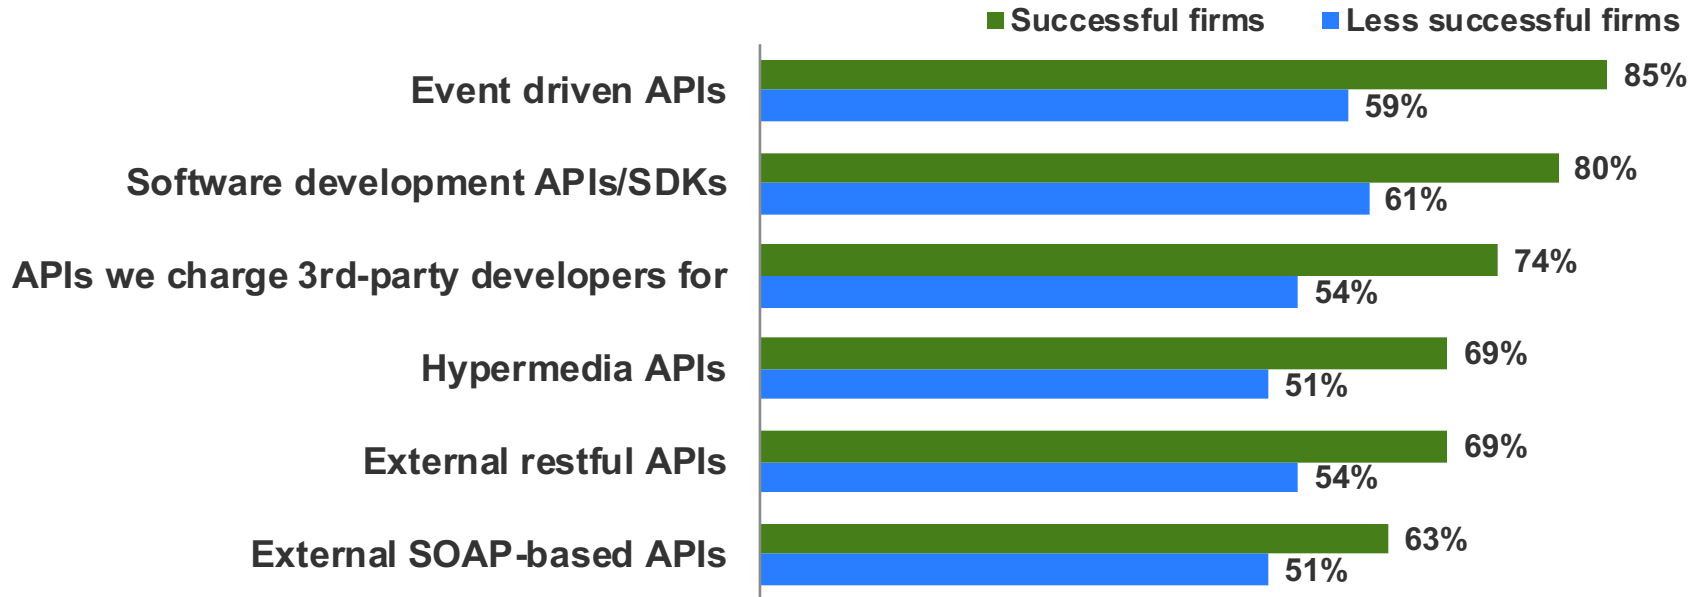

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# Successful firms build expertise for many API types

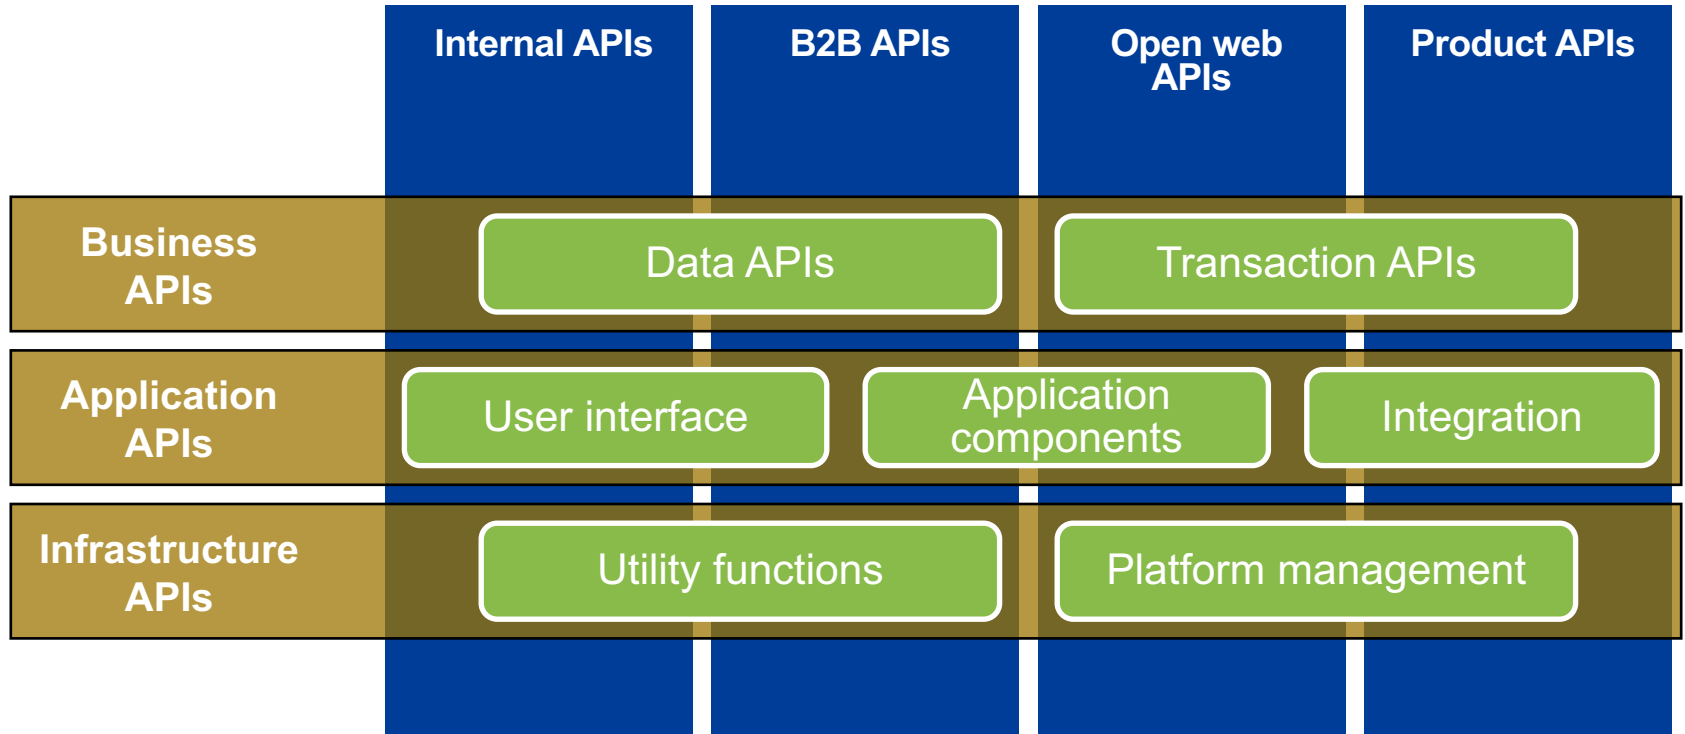

How skilled is your development team at deploying and supporting the following types of APIs? (Advanced/Expert)

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

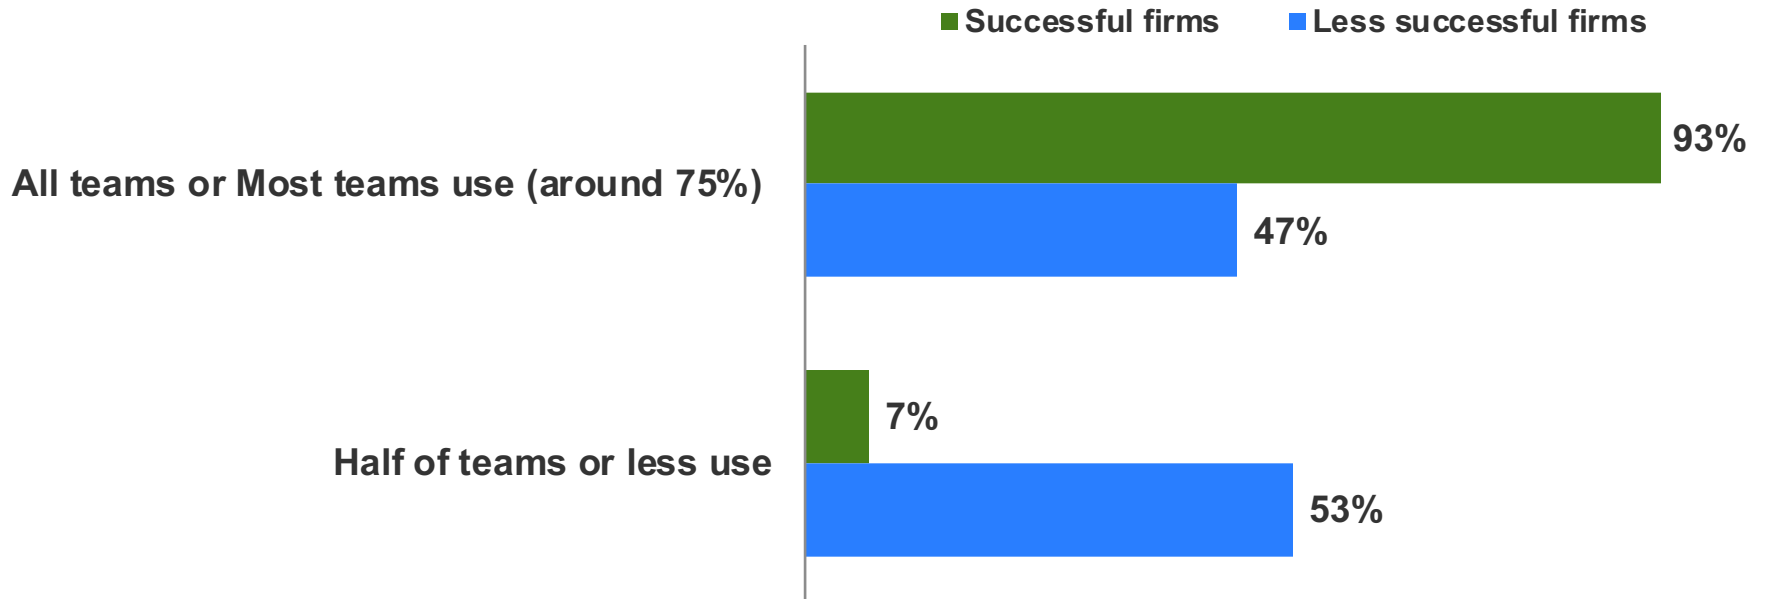

# Establish an API taxonomy to guide design

Source: "Keep API Strategy On Track With An API Taxonomy" Forrester report

# At successful firms, Agile is general practice

What percentage of the development teams at your company use agile software development practices?

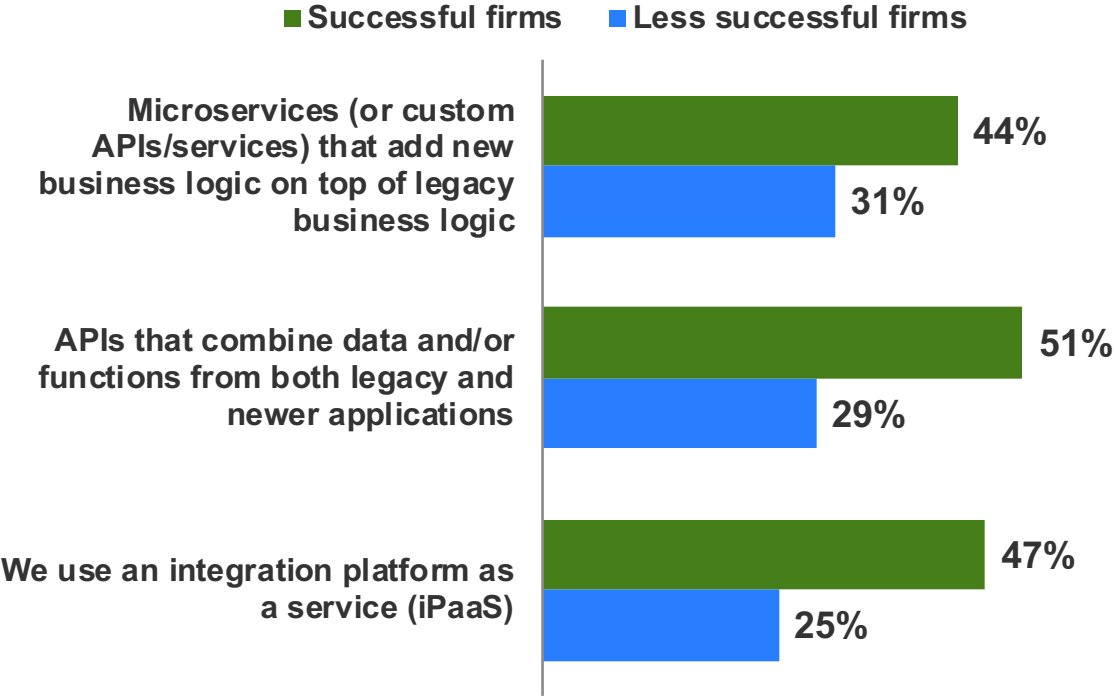

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# What are your organization's approaches to integration today?

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# Successful firms more heavily use microservices, and they blend app development with integration

# Blended integration and app dev with microservices

## Fully-custom microservice

Microservice built via hand-coding in multiple languages, providing a large-grained service

## Integration-based microservice

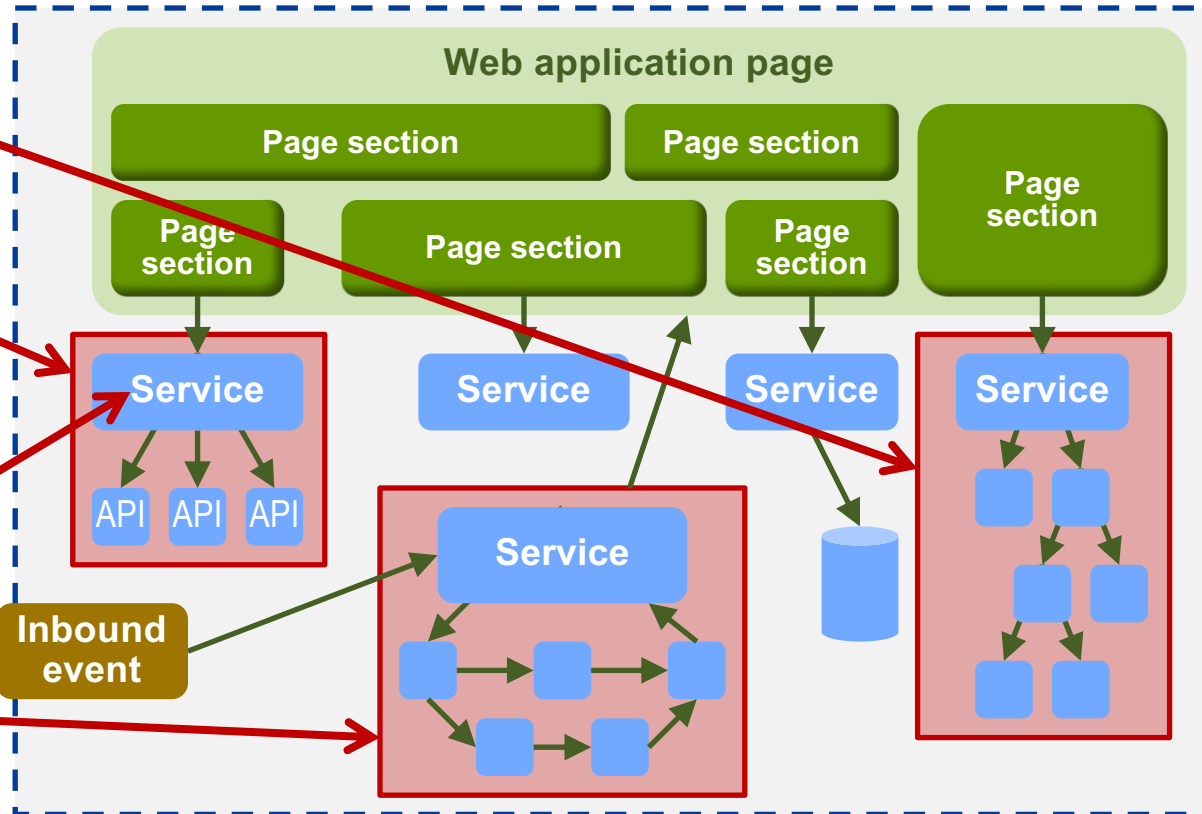

Microservice built with an integration flow across multiple APIs into legacy and partner applications

## Containerized, singular integration flow

A container image comprised of a single integration flow and only the integration elements needed to run it

## Event-driven non-visual microservice

Inbound event triggering a large-grained microservice built using a combination of integration and hand-coding options

# *How do successful firms view Agile integration challenges differently?*

# Successful firms have more vision and collaboration

What is holding your company back from modernizing its integration strategy?

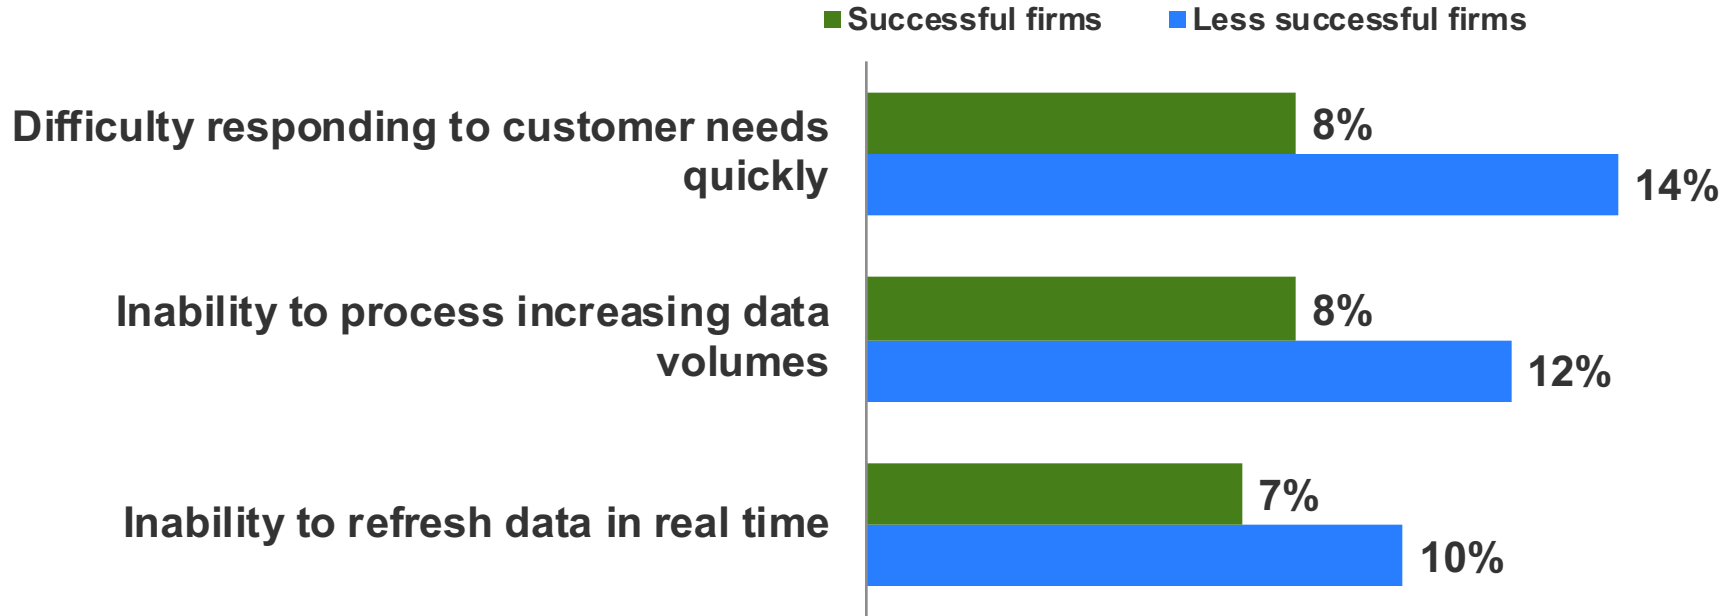

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# Successful firms struggle less with success

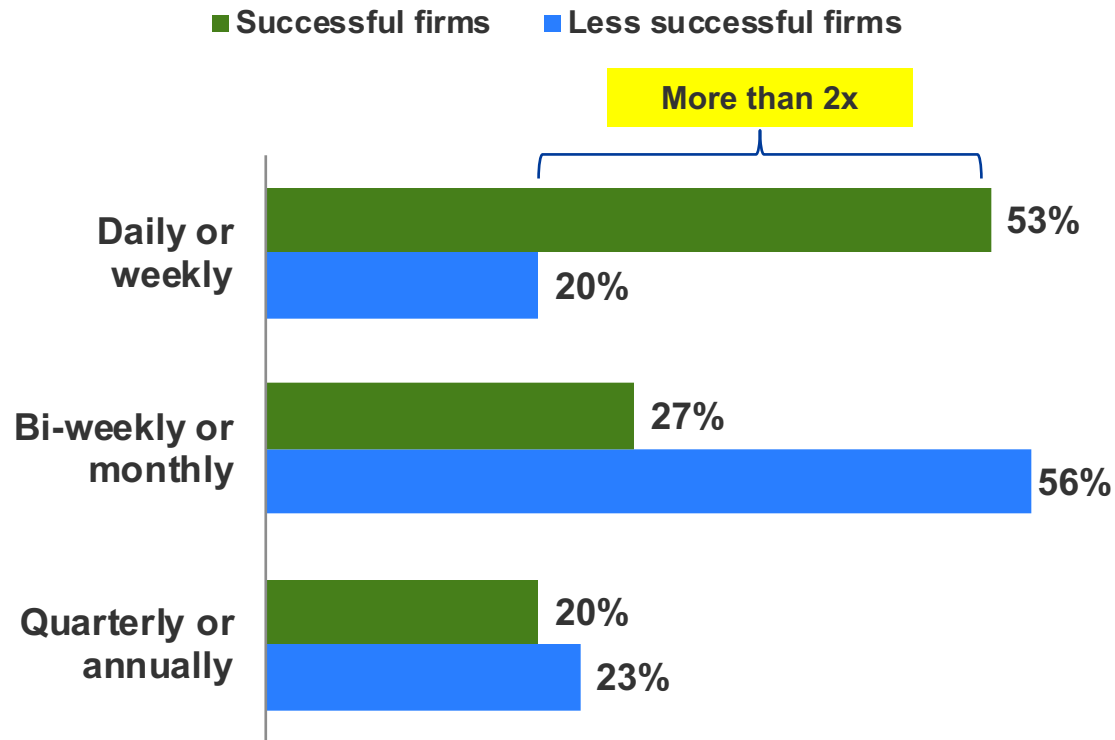

What challenges does/did your organization experience with a current integration strategy?

Base: 144 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

## How frequently do you release or update APIs with new features or added content?

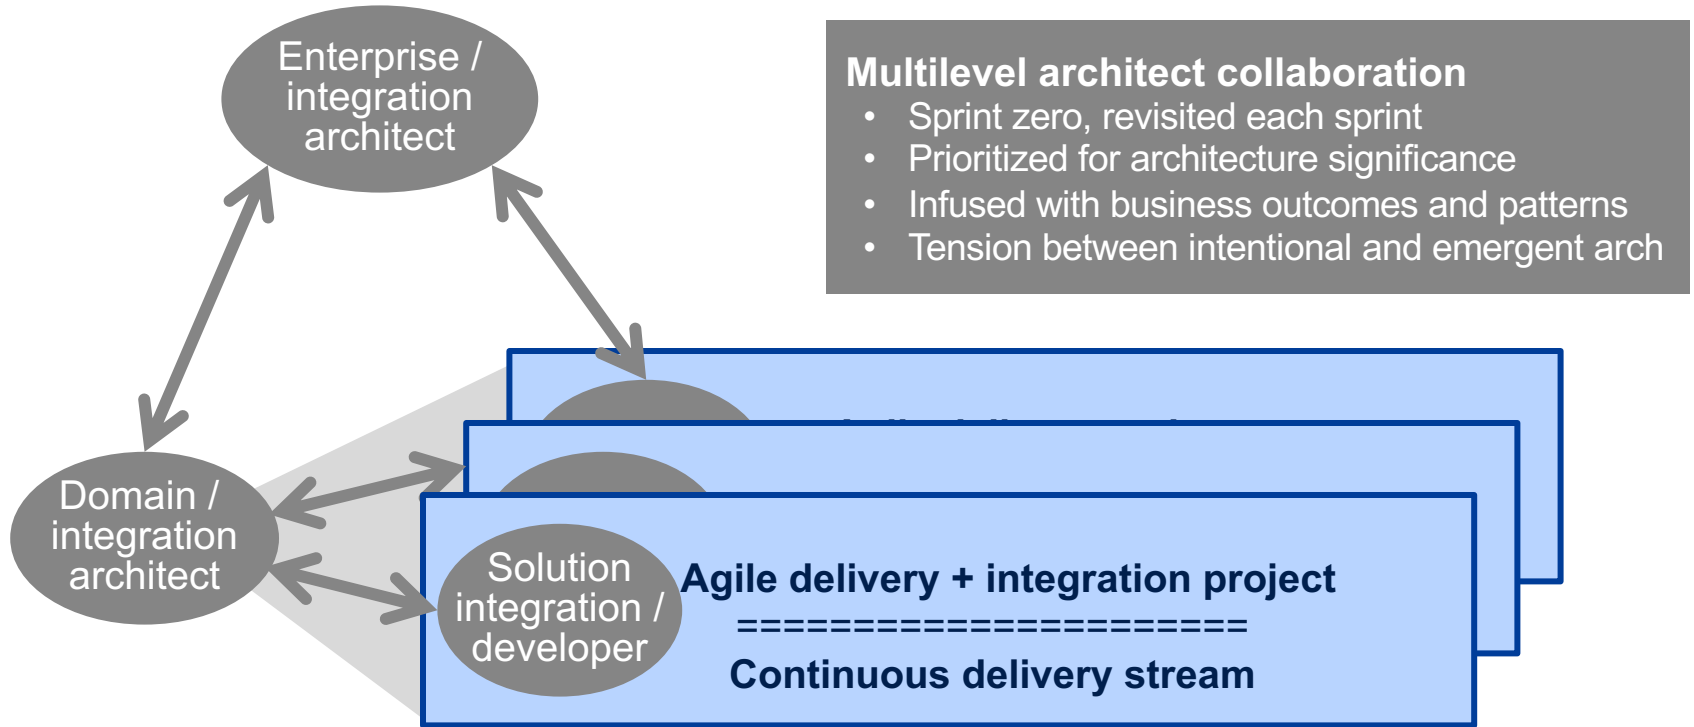

Base: 55 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

**Successful firms are more than twice as likely to release/update APIs weekly or daily**

# Developer-architect collaboration is a critical enabler

Source: "Best Practices For Agile-Plus-Architecture" Forrester report

*What are the key lessons to be learned from successful firms?*

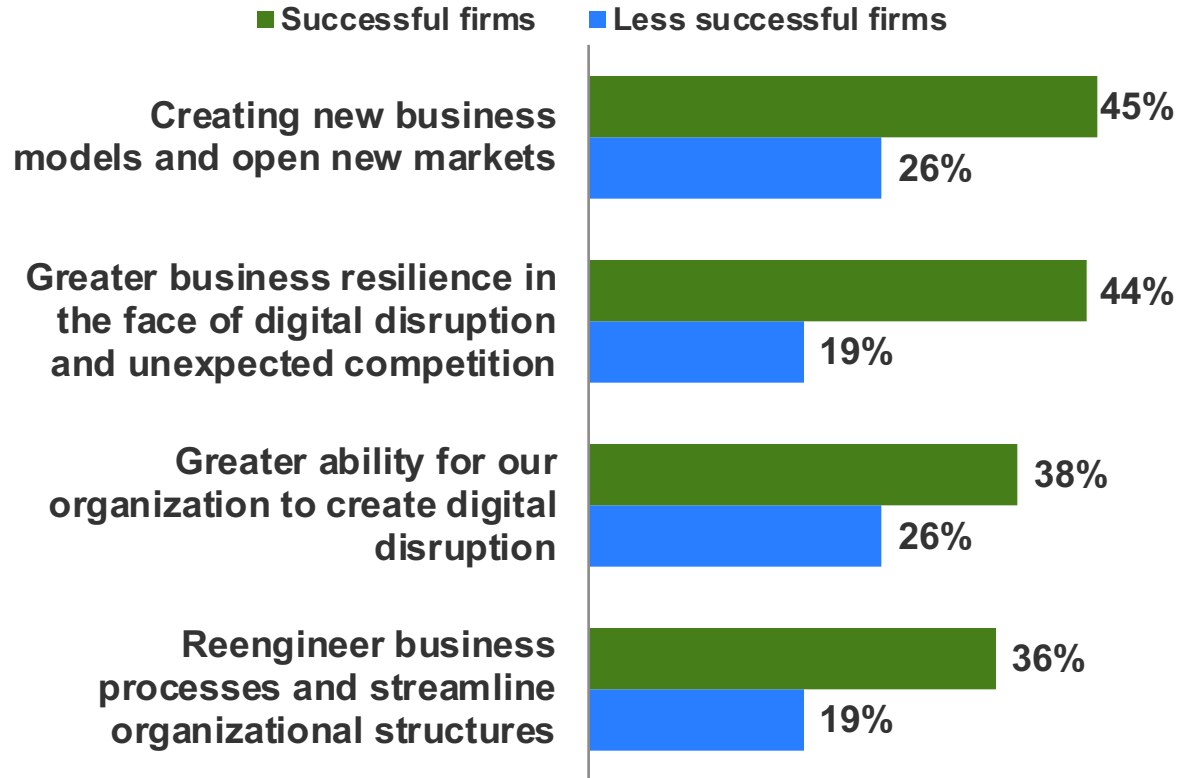

# Successful firms focus on and measure business outcomes of integration

## How do you measure the success of your integration strategy?

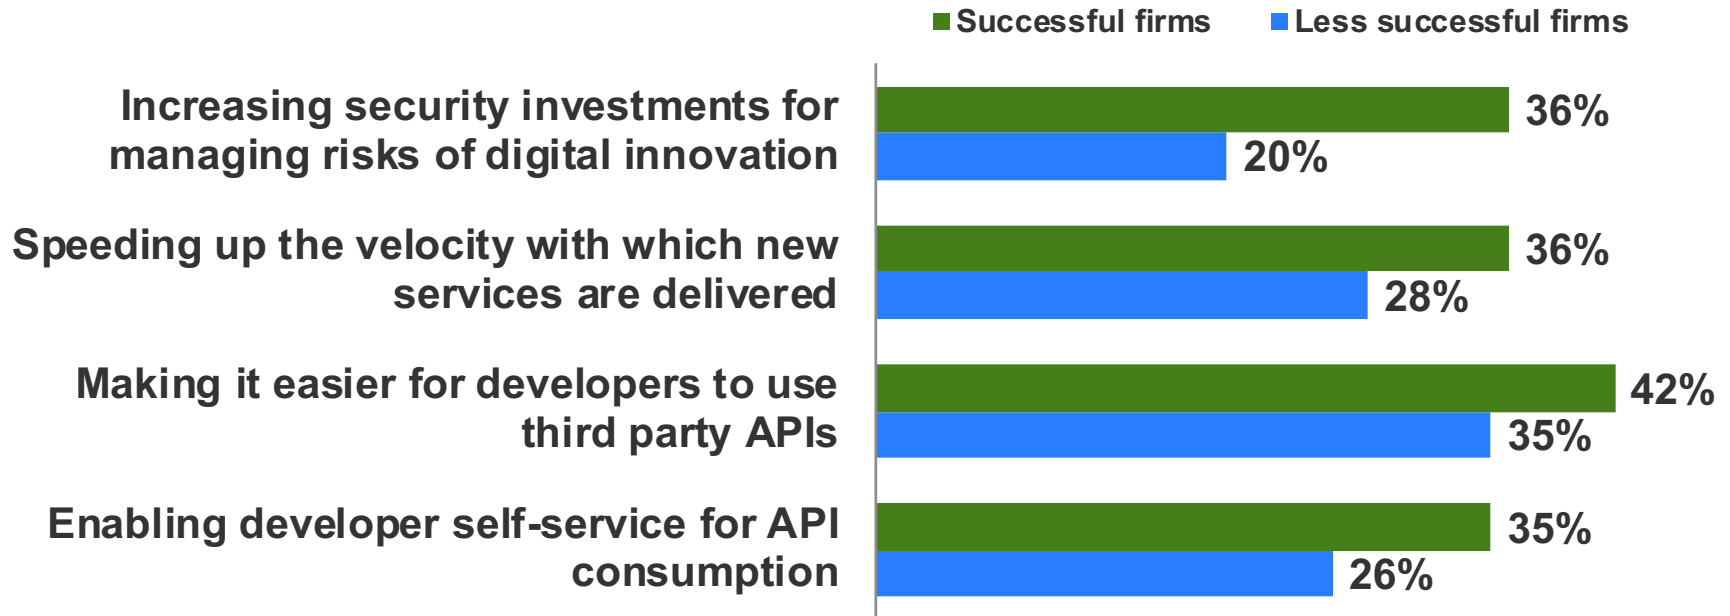

Base: 55 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# Successful firms invest in APIs, security, and agility

What steps is your team taking/have you taken to modernize your integration strategy?

Base: 55 enterprise agile development strategy decision makers.

Source: A commissioned study conducted by Forrester Consulting on behalf of Red Hat, May 2018

# *Recommendations*

**Blend**  
**Agile integration  
with  
Agile development**

# Broaden your integration strategy and architecture

**Business design**  
is your center point  
not application silos

**Blur**  
lines between  
internal integration  
and  
external integration
