Agenda

Quarkus Overview

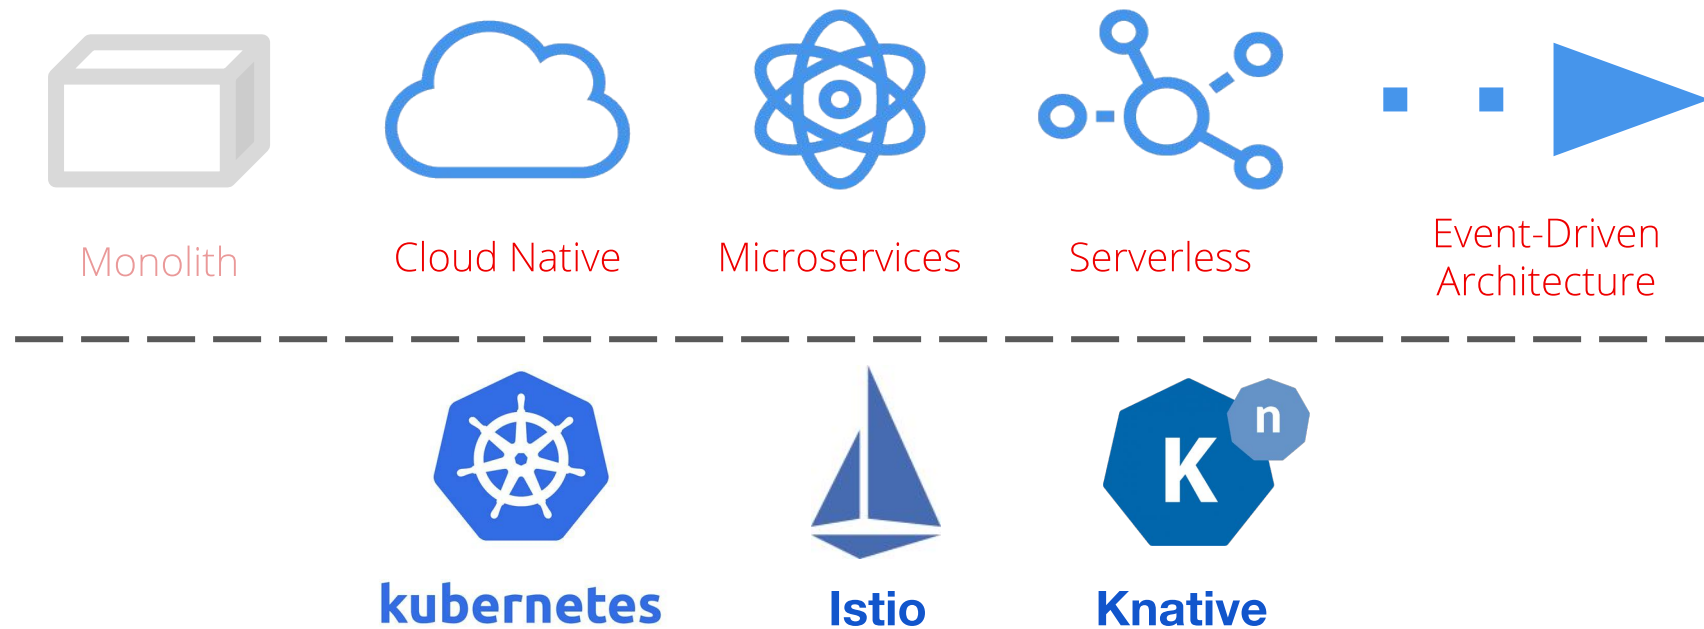

Quarkus in Action – Demo(s)

QUARKUS

Supersonic. Subatomic. Java.

An Open Source Stack to write Java apps

Vibrant Ecosystem of Extensions

Eclipse Vert.x

Hibernate

RESTEasy

Apache Camel

Eclipse MicroProfile

Netty

Kubernetes

OpenShift

Jaeger

Prometheus

Apache Kafka

Infinispan

Flyway

Neo4j

MongoDB

MQTT

KeyCloak

Apache Tika

QUARKUS IN ACTION, NOW?!?

YES, NOW...

Demo – Quarkus + Fullstack Development

An ahead-of-time, build-time, runtime

app.jar

frameworks

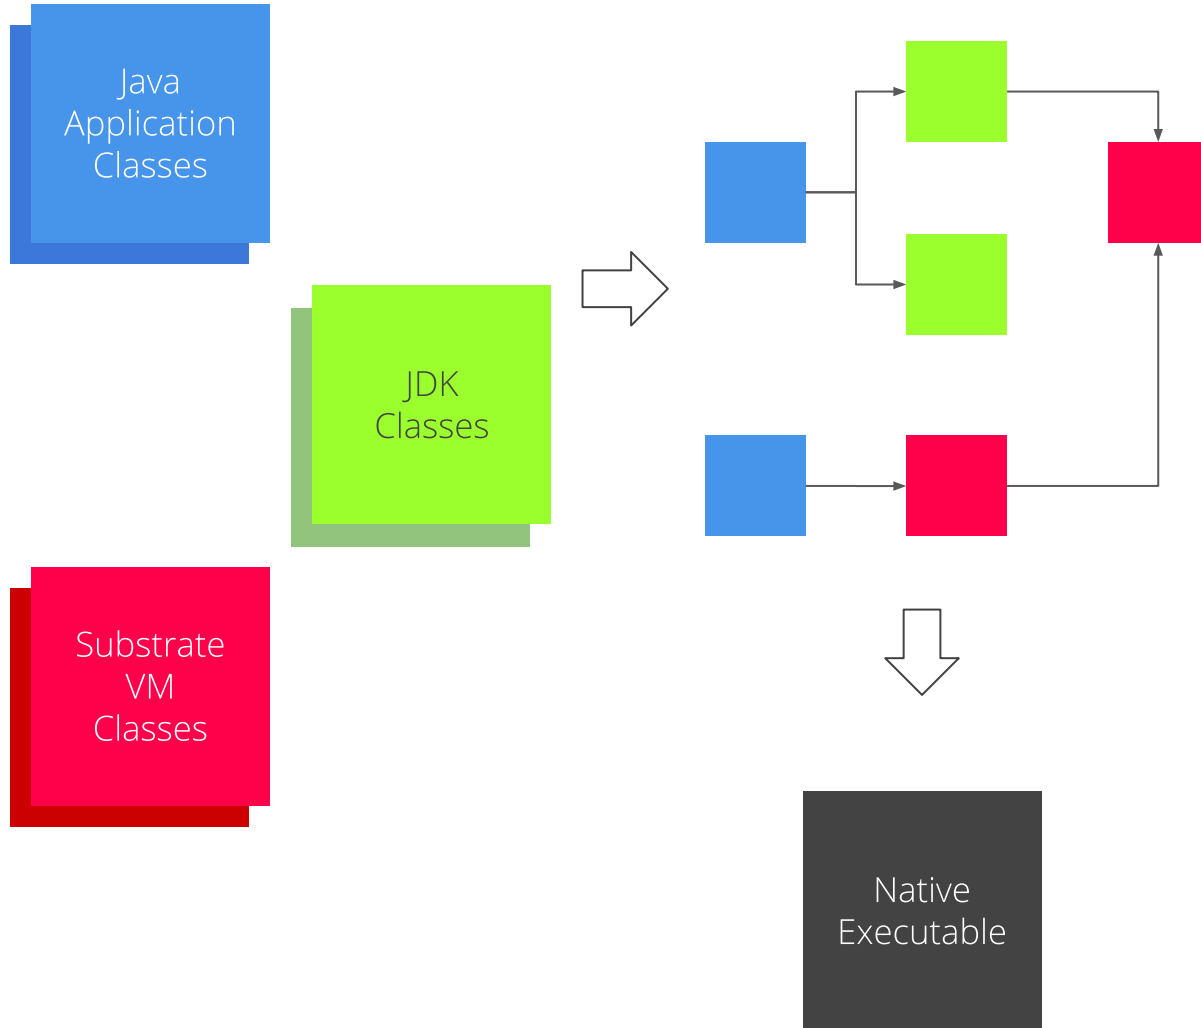

Runnable java app

native-app

AOTC - GraalVM - Dead code elimination

Closed-world assumption

Demo - Quarkus + Serverless

*Packages and Extends
Knative with **Functions**
and is installed and
managed by an
Operator*

Applications

Events

OpenShift Serverless

SERVING

FUNCTIONS**

EVENTING*

Private cloud

Public cloud

* Eventing is currently in Technology Preview

** Functions are currently in Developer Preview

Functions

Powerful CLI experience

- ✓ Local Developer Experience
- ✓ Based on Buildpacks
- ✓ Deploy as Knative Service
- ✓ Project templates
- ✓ Support for Cloud Events/HTTP
- ✓ **Runtimes:**

```
hershey@hershey:~  
File Edit View Search Terminal Help  
(base) → ~ kn func help  
Serverless functions  
  
Create, build and deploy functions in serverless containers for multiple runtime  
s on Knative  
  
Usage:  
  func [command]  
  
Examples:  
  
# Create a node function called "node-sample" and enter the directory  
kn func create myfunc && cd myfunc  
  
# Build the container image, push it to a registry and deploy it to the connecte  
d Knative cluster  
# (replace <registry/user> with something like quay.io/user with an account that  
have you access to)  
kn func deploy --registry <registry/user>  
  
# Curl the service with the service URL  
curl $(kn service describe myfunc -o url)  
  
Available Commands:  
  build      Build a function project as a container image  
  completion Generate completion scripts for bash, fish and zsh  
  create     Create a function project  
  delete     Undeploy a function  
  deploy     Deploy a function  
  describe   Show details of a function  
  help       Help about any command  
  list       List functions  
  run        Run the function locally  
  version    Show the version  
  
Flags:  
  -h, --help      help for func  
  -v, --verbose    print verbose logs  
  
Use "func [command] --help" for more information about a command.
```
