for Kubernetes

Nexus Repository

Open Cluster  
Management

Quay

Pipelines with Tekton

JFrog Artifactory

3scale

# Enterprise Role Based Access Control (RBAC)

Simplify the RBAC management and adoption for Enterprise compliance

# Fully integrated with Openshift

Leverages on several technologies that come with OpenShift

# Enterprise Grade Support 24x7

Support for both Backstage environment and the supported plug-ins

**Business continuity** for the whole team

**Security resources** at your disposal

**Knowledgebase** and troubleshooting

# Red Hat Services: Developer Hub Pilot

## Objectives

### Platform Design & Deployment

- Architecture Review
- IaC Deployment of Backstage/Janus
- Tooling Integration
  - SSO, CI/CD, Vault

### Plugins

- Install and Configure OOTB Plugins
- Design Component Dashboard
- Design Standardized Tech Documentation

### Golden Path

- Template Creation per Archetype
- Onboarding Workflow

### Teams Onboarded

- Streamlined Backstage Onboarding
- Build out Backstage Catalog

### Onboarding to a Cloud Platform (private)

Average time to onboard

**14 days**

Onboarding with IDP

**10 minutes**

### First release with IDP

Average time to release

**51 days**

First release with IDP

**12.5 days**

## Outcomes

- Motivated & Productive Developers
- Streamlined Onboarding
- Consistent Approach and Tooling
- Increase Compliance
- Reduce Time to Market
- Self-Service Provisioning
- Improved User Experience

Support for Red Hat plugins

Fully integrated with OpenShift

Technical Documentation

# Muchas gracias

Red Hat es el principal proveedor mundial de soluciones empresariales de código abierto con un enfoque impulsado por la comunidad que permite ofrecer tecnologías de alto rendimiento de Linux, nube, contenedor y Kubernetes. Le ayudamos a estandarizar en todos los entornos, a desarrollar aplicaciones nativas de la nube, a integrar, automatizar, asegurar y gestionar entornos complejos gracias al soporte, training y servicios de consultoría galardonados.
